NOTE: Capping speeds may vary as they are subject to bottle design and operator efficiency.

FEATURES

- Pneumatically controlled
- Neck-handling, therefore no change parts required
- Adjustable height for different bottle sizes
- Integrated cap unscrambler, chute and capping head, therefore no capping head height adjustment required
- Chucks fitted with magnetic clutches for adjustable torque
- Fitted with conveyor to support bottle base
- Stainless Steel construction, therefore machine can be hosed down
- One operator required
- Pneumatic service unit is fitted with auto draining water trap
- Can easily be retrofitted into existing lines

TECHNICAL INFORMATION

- AIR CONSUMPTION: 150lt/min@6bar
- CRATED SIZE: 1500 X 1500 X 2100mm
- CRATED MASS: 250 KG
