HBP CTOC

The machine is designed for automatic closing and vacuuming of glass bottles and jars with metallic TO caps. It is manufactured completely in stainless steel.

Capacity	pph	up to 16 000
Diameter of the cap	mm	by sample
Diameter of the container	mm	from 70 to 260
Supply		
- Electrical	V/Hz	380/50
- Saturated steam	MPa	0.7-1.0
Consumption of :		
- Stream	Kg/hr	up to 50
- Water for cooling	l/hr	up to 60
Installed power	kW	2.5
Weight	Kg	1200

Advantages :

Fast adjustment for different diameters and heights of packages.
Smooth regulation of capacity.
Reduced contact between caps.
No scratching of the lacquer coating.

Standard Features:

- System for cooling the closing belts.
- System for ventilation of the machine with stainless fan.
- System for ventilation of the machine with a stainless steel fan.
- Front lid with heat resistant hardened glass.
